## SKILLS

React, Redux, Ruby, Rails, Javascript, HTML, CSS, SQL

## PROJECTS

**REPOSTI** (React/Redux, Ruby on Rails, PostgreSQL, Amazon AWS, Webpack)

[live](#) | [github](#)

*A Tumblr website clone with multiple post-type uploading and retrieving capabilities*

- Built out numerous React Components including custom forms that allowed for multiple posting type variations, including the ability to upload various file types to AWS
- Authored multiple Redux cycles using jQuery AJAX to listen for API requests to our Rails backend
- Integrated React Native Router to make navigation intuitive and prevent unauthorized access to parts of the web app

**THERAPUPPY** (React/Redux, MongoDB, Mongoose, ExpressJS, Amazon AWS, Nodemon)

[live](#) | [github](#)

*A marketplace for dog owners to rent out their dogs to those in need of a furry friend*

- Took the role as Team Lead and delegated responsibilities to individual team members
- Managed the project timeline while giving team members autonomy and avoided micromanagement
- Built out numerous React Components including custom modal forms that allowed for the ability to upload photos to AWS

**COMMANDER** (Vanilla DOM, JavaScript, Webpack)

[live](#) | [github](#)

*A game built about conquering all of the opponent's bases on board, versus multiple AI computers*

- Utilized the HTML 5 Canvas to create an interactive game
- Incorporated several select options so that the player may modify the game and the AI
- Designed several AI types so that there is a variance in how all of the computers play

## EDUCATION

**Web Development - App Academy**

Dec 2019 - Apr 2020

**Bachelor of Science, Computer Science - California State University, Fullerton**

2013 - 2016

## EXPERIENCE

**Head of Information Technology**

*ATI Electrical Supply, Las Vegas, NV*

Feb 2018 - Oct 2019

- Lead the technical aspect of migrating the company's ERP to NetSuite and educated employees on the utilization of the new ERP (From Savance to NetSuite)
- Advised and implemented technological solutions for employees, both in-house and remote
- Organized and restructured processes for more efficient and productive environments for the employees

**Junior Software Engineer**

*MCLSS, San Juan Capistrano, CA*

Dec 2016 - Jun 2017

- Interacted with customers directly and applied immediate solutions through the application software
- Designed and implement features to expand upon existing software
- Utilized SVN to commit and collaborate with team members that worked remotely
